Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3736

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10-25, 28, and 29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S.

Patent No. 6375622. Although the conflicting claims are not identical, they are not patentably distinct from each other because system claims of 20-25 and 28-29 of the patent are merely broader versions of the patented claims, and, as such, are covered by the patented claims. In addition, with respect to claim 10, it would have been obvious to use the device of the patent to monitor a handwriting activity. The exact handwriting activity would have been obvious to one skilled in the art.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no antecedent basis for the second sensory signal.

Art Unit: 3736

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 11, 13, 14, 16, 17, 20-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Fleischaker. Fleischaker shows a method for treating a health condition of a user including determining a sensory signal, skin temperature (see column 2, lines 58-65) of a user while the user is writing and using the sensory signal to feedback to the user to induce a looser grip, which treats the medical condition. The examiner notes that handwriting is copying an graphic element. The signal is indicated by a color change of the sensor. The examiner notes that writing is consider to be” composing a graphic production.”

Claims 20, 21, 22, 23, 25, 29, and 30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Reuss et al. Reuss shows a system including a plurality personal care devices each with a plurality of sensors that are used to treat a ,medical condition.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6, 7, 9, 12, 15, 18, 19, 26, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fleischaker. The only feature lacking of Fleischaker

Art Unit: 3736

is the step of providing the graphic element. Fleischaker states it is used for writing, but it does not state whether the thing to be written is provided to the user. The examiner notes that Fleischaker is intended to prevent further injury during all writing including drawing, tracing, and copying. As such, it would have been obvious to use the device of Fleschaker when drawing or copying or tracing as well as freehand writing, to prevent injury to the user. The examiner further notes that copying or tracing involve providing a graphic element.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 5 defines over the art in that none of the art shows an eeg device in combination with a graphic design element (brush, pen, pencil etc) as claimed.

Claim 8 defines over the art of record in that none of the art has a graphic design element with 2 sensors, as claimed.
